

Lamifilm B Series

PTFE Insulation Cloth

PTFE insulation cloth is a high-performance thermal insulation material made of PTFE. It features high temperature resistance, corrosion resistance, low thermal conductivity, excellent flexibility and easy cleanability, and is widely used in industrial insulation, building thermal insulation, fire protection and other fields.

Product Color: Black

Product Model: Lamifilm B-1650

Coating: PTFE

◆ Application

Industrial thermal insulation, building heat insulation, fire protection, food processing, chemical anti-corrosion

◆ Test Data Sheet

Item	Unit	Lamifilm B-1650
Specific Gravity	oz/yd ²	16.5
Max Width	mm	1500
PTFE Content	%	55
Tensile Strength-TD	N/5cm	8779
Tensile Strength-MD	N/5cm	7821
Tear Resistance-TD	N	695
Tear Resistance-MD	N	612
Work Temperature	℃	-73/+310

Company Statement: The parameters provided are not used to determine the quality of the film or the final production warranty standards.
